It still features some antique stone millstones and some wooden gears. The building is located near a stream and includes approximately 700 square meters of land. The renovation project, which includes the construction of a total living space of over 190 square meters, remains to be completed. The property is accessible via a road that is not particularly wide, but is accessible by suitable and necessary means for the renovation. Currently registered as C/2, it is therefore ineligible for government incentives.
